PROPOSED RECREATION ELEMENT OF THE YOLO COUNTY GENERAL PLAN

Introduction

The Recreation Element of the Yolo County General Plan is an attempt to identify some of the outdoor recreation needs of the county plus an inventory of the physical resources and desirable regional recreation areas which might help to alleviate the shortage of recreational facilities in the county.

PRELIMINARY STATEMENT OF OBJECTIVES AND STANDARDS

The following preliminary statement of objectives and standards has been adopted for the purpose of establishing the scope of this plan. The objectives of the plan are:

Objectives

A. To protect and preserve as many of the County's recreation resources as possible.

B. To acquire, provide and maintain diversified regional-type recreation facilities to satisfy the leisure time needs of all of the County's residents. Yolo County's responsibility should fall between that responsibility assumed by the City, State and Federal agencies.

C. To preserve the open space resources of the County and plan for their best use.

D. To develop appropriately those areas which have historic and scenic value.

E. To cooperate with adjacent counties, state and federal agencies in the acquisition, development and administration of recreation facilities and resources for joint use and mutual advantage.

F. To cooperate with private individuals and organizations in the preservation, acquisition and administration of recreation resources.

GENERAL PLAN

In developing the Recreation Element, population density, land use, and circulation have been considered. The proposed recreation areas have been coordinated with the land use and circulation system shown in the General Plan.

PRESENT AND FUTURE NEEDS FOR RECREATION

Recreation is a vital need in today's world. It is perhaps the greatest opportunity for self expression, for doing what one really wants to do and not what one is forced to do to earn a living. Works and even living in general, take place hurriedly under crowded and often noisy conditions. Recreation under conditions of one's choosing is necessary to relieve these tensions.

The demand for all forms of outdoor recreation will increase at an unprecedented pace during the coming years. There will be a substantial rise in each of the factors which most affect the demand for recreation: population; per capita income; leisure time; and ease of travel. Combined, their impact on the need for parks and other open space becomes a major challenge of our time. For example, California's population has doubled every 20 years since the end of the Civil War. Between 1960 and 1980 our state's population may increase from 15,000,000 to 30,000,000. It is nearly 19,000,000 now.

Probably the greatest factor in the need for more recreation facilities is the rapidly expanding population. California's population is expected to increase roughly 72% between 1960-1980, and by the year 2000 it is expected to double the 1965 population!

Concentrations of population and economic activity in the future will be determined more by the economic advantages of various localities, including the relative desirability of the physical environment for living and working, than by the local availability of natural resources and currently used natural sources of energy. Because of increasing population, much more land will be used for urban purposes. The increased urbanization and industrialization in metropolitan areas will put greater pressures on people and increase their need to escape to the open spaces for recreation.

Personal income in California is greater than the national average. The per capita average income in California for 1966 was $2,632 and is estimated to increase to $3,079 in ten years time, based on current dollar value. However, as personal income rises, it does not take as great a proportion to satisfy basic needs leaving more money for other purposes, such as recreation. Family travel is limited by income. Families in the low income brackets find their recreation chiefly in the community while those having median incomes travel into areas beyond the community and those from high income groups travel wherever they wish.

Counting paid vacations, holidays and unpaid weekends, many workers have over 110 days of leisure time each year. For those who do not work for wages, the amount of leisure time is varied. Retired persons have a great deal of time, considerably longer than 110 days. School children have long summer vacations and holidays. The leisure time of housewives varies with their families demands but the trend points to an increase.

In all probability, automation will greatly reduce the amount of human effort required for production of necessary materials and tangible goods. The average week of gainful labor may be about 24 or 25 hours in the future, leaving a greater protion of leisure time.

Through progress in science and medicine, the average life span will be lengthened and the proportion of the population age 60 and over will be substantially larger than in the past. Although life expectancy will increase, the working years will remain constant. Therefore the leisure program for the aged will be proportionately greater.

In California in 1960 there were 5½ million passenger cars and this is expected to increase to almost 12 million by 1980. In 1960 the average mileage per passenger car was 10,000 miles for a total of 55½ million miles. By 1980 this is expected to increase to 151 million miles. Almost one third of this mileage will be for recreational purposes.

YOLO COUNTY - HISTORY, CLIMATE AND TOPOGRAPHY

The County lies near the southern end of the Sacramento Valley. It is bounded on the north by Colusa County and on the south by Solano County. Just across the Sacramento River to the east are Sutter and Sacramento Counties, the latter containing the State Capitol. The total area is 662,000 acres or 1,034 square miles, of which ninety-four percent is privately owned. The southern tip of the county is sixty-five miles by highway from San Francisco.

The Vaca Mountain ridge and its foothills form a belt of broken country several miles in width just within the western edge of the county and extending the full length of the border. These mountains are rugged but not very high and the loftiest peaks seldom attain heights of more than 2000 feet. From the top of the ridge the elevation drops rather sharply to the alluvial plain to the eastward. About ten miles east of the western boundary and projecting southward about twelve miles into the county from its northern border is a low ridge known as the Rumsey Hills. Between this ridge and the Vaca Mountains is the Capay Valley, the floor of which is covered by deep fertile alluvial soil.

Most of the county outside the two upland areas mentioned above is almost perfectly level, sloping very gently toward the east from an elevation of 400 feet at the edge of the hills to ten feet on the river bank near its southeastern corner. In fact, seventy percent of the total area is alluvial plain covered thickly by some of the richest soil in the world. Two fairly large streams rise in the Coast Range and flow across the county. One called Cache Creek flows down the Capay Valley, then turns east to the Sacramento River. The other called Putah Creek follows a course close to the southern border

as it crosses the county from west to east. The former delivers an average annual flow of more than 600,000 acre feet, the latter nearly 360,000. The volume varies considerably from year to year, depending upon the quantify of rainfall.

Average annual precipitation is only 15 inches along the river at the eastern border of the county but gradually increases westward to over thirty inches at some points in the Vaca Mountains. In no part of the crop growing area is there sufficient moisture for large production without the aid of irrigation. As is true in most of California, nearly all of the rainfall occurs in the "rainy" season from early November to the end of April. There is a long dry season from Mid-May to Mid-October in which hardly ever more than a trace is reported. The climate is a pleasant and stimulating kind that permits outdoor recreation activity through most of the year. Afternoon temperatures in July and August frequently rise into the high nineties and occasionally to over a hundred degrees. However, the heat usually is of the dry rather than the muggy variety and lasts only a small part of the day. Even at mid-summer, temperatures usually drop into the middle or low fifties during the night. On the lowlands that compries the major part of the county area, winter temperatures seldom fall below thirty degrees at night and then usually rise into the fifties during the daytime. Freezing weather usually occurs intermittently and in a period lasting not more than a few weeks during the coldest part of the year. The obvious recreational advantage of this type of climate and topography is that it lends itself to easy development, with long recreation seasons, abundant water and a mild climate.

DEVELOPMENT OF THE REGIONAL PLAN

The Yolo County Park and Recreation Advisory Committee took advantage of many comprehensive recreation studies in its research. Some of these being The California Public Outdoor Recreation Plan, parts 1 and 11, The State Department of Parks and Recreation Park and Recreation Information System (Paris), County Regional Parks and Regional Recreation Areas (a planning guide), State Division of Recreation and many more.

SELECTION OF RECREATION AREAS

It is not the intent of the Recreation Element to suggest that the County provide all of the recreation areas that will be needed for our future population. Federal, State and municipal governments, special districts, and private enterprise all do, or will, operate recreation facilities in the County. It is expected that, as a direct result of sound planning and cooperation, these entities will continue to carry and perhaps increase their share of the burden of supplying much needed recreation facilities in Yolo County.

The County will request and encourage developments by the State and Federal Government and local governments and agencies and will encourage private development of all forms of recreation and resort facilities to supplement publicly provided facilities. Consideration will be given to reduce any possible competition with existing or proposed private facilities. Concessions providing food service or other commercial service within public park areas will be leased to private operators wherever feasible. County parks and recreation areas and facilities will be coordinated with existing or proposed developments of public and private agencies.

The 168,500 people who are expected to be living in Yolo County by 1990 (23 years from now) will require extensive recreation facilities. The purpose of this plan is to indicate the potential sites adaptable to recreational uses that will provide a countywide development program, both now and in the future.

REGIONAL RECREATION AREAS

The plan has been confined to regional recreation areas. Regional recreation areas offer recreation or scenic attractions that are of countywide significance; areas that provide spaciousness which the typical small neighborhood parks do not provide. A regional park is of sufficient size to offer facilities for family and group picnicking, camping, nature study and diversified play areas for all age groups. It is a park which can also accommodate swimming pools, bowling greens, athletic fields, water oriented facilities and golf courses (if size permits), but is not limited to such uses.

Various types of land areas lend themselves to regional park development, hills and mountains, river banks and arroyos, reclaimed marshes, reservoirs and flood constrol basins, etc.

Neighborhood and community parks, although included in the inventory and evaluation of recreation facilities, are not considered to be regional and have not been included as a part of this plan.

VALUE RATING

A value was established for each potential site, based upon three major factors: physical suitability; ability to generate demand; endangered availability of site.

PRIORITY GROUPS

It is recommended that park acquisition and development priorities be selected on the basis of most effectively fulfilling the increasing recreation demand of the County's residents.

Three of the proposed nine sites will be constructed as a part of a water project, which will determine their development schedule.

BASIC CONSIDERATIONS

During the course of study and research for this proposed recreation element a great deal of data and information was assembled. Much of it appears in this report in summary form as it was not practical to present it in the degree of original detail. Field surveys were made, user studies were conducted, aerial photographs were analyzed and reports were reviewed. The considerable amount of investigation, analysis and determination oriented this plan toward the the camping, picnicking, activities parks, and water oriented aspects of regional recreation. Although these appear to be only a small part of the recreational picture, achievement of recreational development in these fields will also augment and promote the development of the facilities for other types of recreation. Some of these specialized facilities will be included in the proposed recreational areas as each is studied in detail.

If a potential park site becomes unavailable or developed for purposes other than recreation, an alternate area should be selected to take its place. The loss of any one of the proposed areas would be damaging to the whole recreational plan, because this plan has not been developed to meet optimum goals, but simply to satisfy the basic recreational needs of the people.

One of the results of this report should be the initiation of additional studies and recommendations for other recreational essentials, such as a countywide system of greenbelts, an open-space preservation program, and a scenic highway plan.

Benefits

Earlier in this report mention was made of the need for outdoor recreation, but little was said about the benefits. This plan proposes areas for family and social togetherness, it promotes healthful living and offers spiritual values and it provides areas for exercise necessary for physical fitness. It is valuable for educational experience in the world of nature. It would be impossible to justify these benefits on a dollar for dollar basis, but there are important economic effects in the provision of outdoor recreation which should not be overlooked.

The effect of parks on adjoining land values is one example. The City of Minneapolis, noted for its fine park system, reports that the increased values in the City due to park developments have amounted to several times the cost of the entire park system. City after city throughout the United States cites the same experience: parks enhance the value of surrounding property. A county in New Jersey found that land adjacent to parks increased in value three times as fast as other property.

Parks take land off the tax rolls, but this is not necessarily a net loss. In many instances it is a gain for there is scarcely any lag between the removal of land from the tax rolls for public purposes and the establishment of new businesses to take its place - often at a assessed value far exceeding that which was removed from the rolls.

Two other economic effects of outdoor recreation are the attraction of new industries and a tourist trade to an area. Many of the manufacturers and businesses searching for new sites list recreational opportunities as one of the deciding factors in the location of their facilities. If a community can attract two dozen tourists a day throughout the year, it would be economically comparable to acquiring a new manufacturing industry with an annual payroll of $100,000. Thus, we have recreation bringing industry and a broader tax base into the community as well as the introduction of "new" money spent by visitors to Yolo County.

OPEN SPACE RESERVES

Open space is a fundamental element in any desirable living environment. Concepts of open space range from a few acres of private park in a subdivision to miles of greenbelt characterized by farming or scattered development.

Since most of Yolo County's land is in agriculture and some 23,000 acres have been retained by the Bureau of Land Management for public use, it appears that open space in Yolo County is not an immediate problem.

Open space can be assured for varying periods of time and through a variety of techniques: subdivision design; low density zoning; special resort districts; deed restrictions; scenic easements or agricultural preserves which will provide for mutually beneficial agreements between landowners and taxing authorities, or any other device which stops short of outright purchase.

LEVEES AND STREAM BANKS

Levees and stream banks are a natural potential for picnic areas and riding and hiking trails. The maintenance roads of the Yolo County Flood Control and Water Conservation District could be utilized for this purpose (where practical).

TREES

A program of tree protection and tree planting will contribute toward preserving and enhancing the attractiveness of this County by providing relief from the hot, dry summer season.

Further provisions will be needed to protect the "foreground" of our extensive farm land by providing a landscaped corridor for County Highways and State Highways that pass through farm land,

foothills and along the roads providing access to major recreation areas. The quality and extent of private development in rural areas depends to a large extent on the character of land use adjacent to highways. Attractive scenic routes will increase recreation travel, which can be an important element in the economic base of this County.

FUTURE STUDIES

It is recommended that although waterways, trails, and open space have been considered in this report, waterways, trails, open space, scenic highways and history should be studied in depth by the Park and Recreation Advisory Committee. The findings of these studies should be published along with recommendations concerning whatever action should be taken to preserve and protect these natural resources.

COMMUNITY AND NEIGHBORHOOD PARKS

Recreation deficiencies exist in many unincorporated urban areas in Yolo County. One area of major deficiency is the lack of neighborhood and community recreation centers in the unincorporated urban area of East Yolo. The cities of Davis, Woodland, and Winters do not provide park facilities outside the city limits. The County heretofore has not attempted to provide city-type services in the unincorporated urban areas, and this has resulted in the growth of areas without adequate recreation. Although not a part of this report, additional studies should be made of the neighborhood park needs throughout the County.

As an interim solution, until the towns and urban fringes annex or incorporate, the County may assume responsibilities through county service areas and assessment districts for land acquisition, site planning, construction and operation of neighborhood and community recreation facilities. The cost of urban recreation facilities should be borne by those specifically benefited. Costs for their operation can be met by the creation of a county service area. Costs for land acquisition and development can be met by assessment districts. County general tax funds should be reserved for the development and maintenance of Regional County Parks.

1- PUTAH CREEK FISHING ACCESS AREA

The Putah Creek Fishing Access Area is an existing 60 acre facility, purchased and improved by the California Wildlife Conservation Board. The improvements consist of parking areas, chemical toilets, and potable water (by means of a hand pump).

This facility is located approximately seven miles west of Winters, on State Highway 128, just downstream from Lake Berryessa.

In 1966 the County Parks Department installed 10 picnic tables at the access area, to provide a much needed picnic area.

Because the Putah Creek Access Area is extremely narrow, and sometimes subject to high water from Lake Berryessa, extensive development would be difficult. It is recommended that the parking area be improved, the toilet facilities be improved, and the water system updated.

2- COTTONWOOD RESERVOIR

Located southwest of the Town of Madison, the proposed Cottonwood Reservoir Recreation Area would be developed as a day use facility by Yolo County.

The multi-purpose day use area will offer opportunities for picnicking, swimming, boating and other general park uses. The picnic area will include individual family units and group facilities, a boat launching ramp, and loading pier will be included in the Public Waterfront Development.

Initial development would include a 60 acre multi-purpose day use area on the north shore, with natural areas for quiet relaxation, nature study, and other passive uses. The whole

area will be planted in a natural manner. Boating and fishing from both shore and afloat will occur over most of the reservoir. Motorboats will not be permitted. Roads will be kept to a minimum necessary for access and service.

The preliminary development will include fencing of the entire recreation area to protect from grazing and other misuse, to control access and to permit entrance fees to assist in operation and maintenance cost.

3- PALMER CANYON RESERVOIR

Located west of the community of Brooks, Palmer Canyon Reservoir will have a permanent pool of approximately 200 surface acres and will maintain a constant level throughout the year.

Since the water surface is small, it would seem desirable to restrict the boating use to "no wake" boating. This, of course, eliminates all motor powered boats and creates an atmosphere entirely different than any other presently operating in this region.

Areas will be set aside for family picnicking, and group picnicking. The only food concession that will be provided will be of the "snack bar" variety consisting of a series of vending machines located near the swimming lagoon.

The 70 acre Palmer Canyon would provide for swimming, boating, picnicking and hiking.

4- CANYON PARK

Located on County Road 40, across the Low Water Bridge from scenic Highway 16, in the northwestern corner of the County. The proposed 200 acre Canyon Park would provide Yolo County with a mountain atmosphere unmatched by other areas of our County.

This facility, located on Cache Creek, would provide an ideal warm fishing area, with clean beaches for swimming and wading, picnicking, camping and nature study. Since it provides direct access to the nearly fifteen thousand acres of Bureau of Land Management property, we could provide a "one of its kind" facility by the addition of horseback riding facilities which would not only allow people the opportunity of renting horses but to also bring their own horses by trailer into this area to ride the extensive back country.

Riding, fishing, swimming, picnicking, nature study, and hiking would be the prime attractions of this site.

5- OAT RESERVOIR

Oat Reservoir is a proposed seven-hundred and sixty surface acre facility located five miles south of Dunnigan. This facility is proposed by the Bureau of Reclamation as a part of the West Side Canal System.

The shorelands would consist of gently rolling, grass covered hills. Most of the recreation activity would occur from April through September with the principal uses including picnicking, boating, swimming, water skiing, fishing, riding and hiking.

The 200 acre on shore recreation development would be constructed by the Federal Government under P.L.8972 with the operation and maintenance the responsibility of Yolo County.

6- PUTAH CREEK TRAILS

Proposed fee title acquisition of twenty-two miles of Putah Creek by the United States Bureau of Reclamation. This acquisition would allow public access to the Creek for fishing, riding and hiking from the Bypass to Lake Solano.

7- YOLO COUNTY PUBLIC GOLF COURSE AND COUNTRY CLUB

The existing 150 acre excess land at the Yolo County Airport (Davis-Winters flight-strip) would make an ideal site for a county operated golf course - country club complex. The standards established by the American Golf Association indicates that Yolo County could support a regulation size 18 hole course at this location, if we included a pro-shop and club house in the initial phase of development. It is also recommended that we include a swimming pool and tennis courts as a part of this facility to provide a family use recreation area.

The golf course - general aviation airport complex has proved to be a compatible relationship in many other instances and could also prove compatible at this location.

Although the initial development of a golf course is extremely expensive, property managed, well designed golf courses are one of the few recreation facilities that can be fully self-supporting.

8- COMSTOCK REGIONAL PARK

It is recommended that a regional facility be developed on the interior 52 acre parcel of the City of Davis Community Golf Course site. This facility should serve the day use needs of the cities of Davis and Woodland for a (close-in) regional park and should include picnicking and other day use activities.

9- KNIGHTS LANDING FISHING ACCESS AREA

Improve the parking areas by the addition of paving, bumper-stops, etc. Improve toilet facilities and provide picnic tables.

10- YOLO BYPASS ACCESS AREA

It is recommended that the Wildlife Conservation Board be encouraged to construct a boat launching facility on Department of Fish and Game Managed Land located on the Sacramento River at the Yolo Bypass with access from County Road 107. This facility should include parking, river access and sanitary facilities.

11- SACRAMENTO RIVER RIDING AND HIKING TRAIL

A riding and hiking trail is proposed on the levee bench of the Sacramento River from Knights Landing south to Clarksburg.

12- ELKHORN REGIONAL PARK

Located along Interstate 5, this 86 acre facility could provide Yolo County with an excellent regional park in an area provided with good access from all areas of the county.

Elkhorn Park should be water oriented with boat repairs, boat storage, etc. Much of the boating development could be on a lease basis to a concessionaire who would provide facilities to our specifications. Boat launching, camping, picnicking, etc. should be provided by the county.

13- EAST YOLO REGIONAL PARK

A regional park facility on the Sacramento River near the communities of Broderick and Bryte and West Sacramento. The recreational development should include picnicking, fishing, boat access to the river, hiking, nature study, childrens play area, and related activities.

This development will have to be located either below West Sacramento or above Bryte, due to the lack of large open space between these two communities. The preferred site would be located approximately 1½ miles south of the Barge Canal.

14- CLARKSBURG ACCESS AREA

Improve the parking areas by the addition of paving, bumper stops, etc. Improve toilet facilities, and if practical, provide picnic tables.

Designated Horse Trail

Generally, riding trails are ten feet in width over a distance of 20 miles, and encompass 24 acres of land. It will require two camping sites of five acres, 15 to 20 miles apart.

One horse per mile is trail capacity. People use a horse trail in groups of four or five. Since a trail of 20 miles will take about 3.3 hours to ride, a turnover of 2 is considered a reasonable capacity to produce 132 users per optimum day, or 3.88 user days per acre.

Riding and Hiking Trails

Trails should be located to offer hikers or riders as many interesting vistas or views as possible. Interpretive signs should be used. On extended trails rest stops should be about every 3-5 miles and overnight stops, about every 10-20 miles. In heavily used areas, overnight stops may be equipped with tables, fireplaces, and pit toilets. The trail should be planned with numerous access points and interconnecting links. Average sustained grades of trails should not exceed 8%; sections of 4% or less, at least 500' in length, should be used every mile if practical. At the beginning of an ascent, "pick up" the grade slowly at a rate of 1% per 100 feet of trail.

Beach and Swimming Areas

Beach and swimming areas usually have a minimum shoreline length of 100 feet and a sand bottom. Larger areas have about one foot of shoreline and a strip of beach extending 200 feet from the edge of the water for each five swimmers per day.

Stream Fishing

One mile of stream for every 10 persons.

Anchored Fishing Boats

Four to seven boats per acre of water area.

Power and Sail Boats

Three acres of water area per boat.

Water Skiing

Five acres of water per boat.

NOTES—1. The purposes must correspond in every particular with those stated in the election notice.

2. Insert amount of TOTAL authorized issue.

SPECIAL NOTES:

Education Code Section 21809 provides that the bonds shall be signed by the chairman of the board of supervisors, "or by such other member thereof as the board of supervisors shall by resolution adopted by a four-fifths vote of all its members, authorize and designate for that purpose". If it is desired to have the bonds signed by such member rather than the chairman, then the Resolution and Order, and the bond form, should be changed accordingly, and the Resolution and Order must be adopted by such four-fifths vote.

Education Code Section 22051 provides for redemption of school bonds prior to their maturity at the option of the governing board of the school district. The prescribed statutory procedure and the wide diversity of possible redemption provisions render impracticable a general printed form for such matters. It is therefore suggested, should redemption provisions be desired, that competent financial and legal advice be first obtained.

This form is for use only when the principal amount of any issue has been divided into two or more series and Series A is being issued. If the bonds being issued are of a series subsequent to Series A use Form No. 3011-B instead of this form. If the issue has not been divided into two or more series use Form No. 3011.

PURPOSE OF ISSUE: The bonds were authorized by more than two-thirds of the voters voting at an election held in the district on March 26 1968 and will be issued and sold for the purpose of raising money for authorized school purposes.

SECURITY: The bonds are general obligations of the district, and the Board of Supervisors has power and is obligated to levy ad valorem taxes for the payment of the bonds and the interest thereon upon all property within the district subject to taxation by the district (except certain personal property, which is taxable at limited rates), without limitation of rate or amount.

PRINTED BY A. CAHILL & CO., S. F. 55-0774

TAX EXEMPT STATUS: In the event that prior to the delivery of the bonds the income received by private holders from bonds of the same type and character shall be declared to be taxable under any federal income tax laws, either by the terms of such laws or by ruling of a federal income tax authority or official which is followed by the Internal Revenue Service or by the decision of any federal court, the successful bidder may at his option prior to the tender of the bonds by the Board of Supervisors be relieved of his obligation under the contract to purchase the bonds and in such case the deposit accompanying his bid will be returned.

LEGAL OPINION: The legal opinion of the following firm, approving the validity of the bonds, will be furnished to the successful bidder without charge:

ORRICK, HERRINGTON, ROWLEY & SUTCLIFFE

A copy of the legal opinion, certified by the official in whose office the original is filed, will be printed on each bond without charge to the successful bidder.

Terms of Sale

HIGHEST BIDDER: The bonds will be awarded to the highest responsible bidder or bidders considering the interest rate or rates specified and the premium offered, if any. The highest bid will be determined by deducting the amount of the premium bid (if any) from the total amount of interest which the district would be required to pay from the date of the bonds to their respective maturity dates at the coupon rate or rates specified in the bid and the award will be made on the basis of the lowest net interest cost to the district. The lowest net interest cost shall be computed on a 360-day year basis. The purchaser must pay accrued interest from the date of the bonds to the date of delivery. The cost of printing the bonds will be borne by the district.

RIGHT OF REJECTION: The Board of Supervisors reserves the right in its discretion to reject any and all bids and to waive any irregularity or informality in any bid.

PROMPT AWARD: The Board of Supervisors will take action awarding the bonds or rejecting all bids not later than 24 hours after the expiration of the time herein prescribed for receipt of proposals unless such time of award is waived by the successful bidder.

PROMPT DELIVERY: Delivery of the bonds will be made to the successful bidder at the office of the County Treasurer of said County as soon as the bonds can be prepared which it is estimated will be within 30 days from the day of sale, but not prior to the date of the bonds.

RIGHT OF CANCELLATION: The successful bidder shall have the right, at his option, to cancel the contract of purchase if the bonds are not tendered for delivery within 60 days from the date of sale thereof, and in such event the successful bidder shall be entitled to the return of the deposit accompanying his bid.

FORM OF BID: All bids must be for not less than all of the bonds hereby offered for sale, and for not less than the par value thereof and accrued interest to date of delivery. Each bid, together with bidder's check, must be enclosed in a sealed envelope addressed to the Board of Supervisors of said County, and endorsed "Proposal for School Bonds of WOODLAND JOINT UNIFIED School District, of Yolo and Solano Counties ~~xxxx~~"

BID CHECK: With each bid must be submitted a certified check or cashier's check for $1,000.00, drawn on a bank or trust company transacting business in the State of California, payable to the order of the County Treasurer, to secure the district from any loss resulting from the failure of the bidder to comply with the terms of his bid. In addition bidders are requested (but not required) to supply an estimate of the total net interest cost to the district on the basis of their respective bids, which shall be considered as informative only and not binding on either the bidder or the district. Checks of the unsuccessful bidders will be returned by the County Clerk by mail, upon the award of the bonds. No interest will be paid upon deposit made by any bidder.

There is no controversy or litigation pending concerning the validity of the above issue, the corporate existence of the district, or the title of the officers to their respective offices and the Board of Supervisors will deliver to the successful bidder a no-litigation certificate certifying to the foregoing as of and at the time of the delivery of the bonds.

1. This Agreement supersedes the Freeway Agreement dated September 4, 1962, and the Supplemental Freeway Agreement dated

July 26, 1965, with respect to that portion of Route 5 between Post Mile 0.0 and 7.0. In lieu thereof, the County agrees and consents to the closing of County roads, relocation of County roads, construction of frontage roads and other local roads, and other construction affecting County roads, all as shown on the plan map attached hereto marked Exhibit "A", between the Sacramento River and Route 113 and made a part hereof by this reference.

2. The State in the construction of said freeway will, at the State's expense, make such changes affecting County roads in accordance with the said plan map attached hereto or as the same may hereafter be modified by mutual agreement between the parties hereto. The State may, at the State's expense, install signs, signals and other traffic-control devices at appropriate locations to be determined by the State in order to regulate, warn or guide traffic upon the highways.

3. The State agrees to acquire all necessary right of way as may be required for construction, reconstruction or alteration of County roads and frontage roads, and the County hereby authorizes the State to acquire in its behalf all such necessary right of way.

4. The County will accept control and maintenance over each of the relocated or reconstructed County roads, and the frontage roads and other State constructed local roads on notice to the County Road Commissioner from the State that the work thereon has been completed, except as to any portion thereof which is adopted by the State as a part of the freeway proper. The County will also accept title to the portions of such roads lying outside the freeway limits, upon relinquishment by the State.

5. The grade separations shown on plan map Exhibit "A" will either be underpasses or overpasses as detailed engineering studies may determine will best fit the locality. It is understood between the parties that the right of way may be acquired in sections or units and that, both as to the acquisition of right of way and the construction of the freeway projects, the obligations of State hereunder shall be carried out at such time and for such unit or units of the project as funds are budgeted and made lawfully available for such expenditures.

6. This Agreement may be modified at any time by the mutual consent of the parties hereto, as may become necessary for the best accomplishment through State and County cooperation of the whole freeway project for the benefit of the people of the State and of the County.

IN WITNESS WHEREOF, the parties hereunto have set their hands and seals the day above first written.

THIS AGREEMENT, made and entered into, in triplicate this 26th day of August, 19 68, by and between the State of California, acting by and through the Transportation Agency, Department of Public Works, Division of Highways, hereinafter for convenience referred to as "State", and the County of Yolo, hereinafter for convenience referred to as "County", witnesseth:

WHEREAS, on October 18, 1965, July 17, 1961, and August 7, 1967, Freeway Agreements were executed between the County and the State relating to the development of those portions of State Highway Routes 80 and 880, within the limits of the County of Yolo as a freeway, and

WHEREAS, under the provisions of said Freeway Agreements, the County agreed to certain adjustments in the County road system, and for the carrying of certain roads over or under or to a connection with the freeways, and

WHEREAS, the State and County have heretofore entered into a Freeway Maintenance Agreement dated August 3, 1959, relating to that certain portion of State Highway Route 80 in the County of Yolo between the Yolo Causeway and the Tower Bridge, and

COUNTY OF YOLO

Woodland, California

Honorable W. W. Conner, Chairman
and Members of the Board of Supervisors
Woodland, California 95695

Gentlemen:

After the review of the 1968-69 tabulation of departmental budget requests and the public hearings with the heads of the respective departments, your Honorable Board adopted the proposed budget for the 1968-69 fiscal year in the amount of $15,646,029. This is $324,419 less than the final budget for 1967-68. This difference is primarily due to the elimination of major capital expenditures from the Accumulative Capital Outlay Fund for new construction funds, which had been budgeted and accumulated previously, and which are now being expended for the new Sheriff's office and County Jail, major hospital remodelling, and the Davis branch of the Yolo County Library. During the course of the review of departmental requests, your Honorable Board made total net deletions of approximately $298,000 from the various fund budgets.

In accordance with the policy determinations of your Honorable Board for the proposed or preliminary budget for 1968-69, there will not be an increase in the basic county tax rate of $2.245 per $100 of assessed valuation. Likewise, the planned expenditures for library and roads do not require an increase in the separate tax rates for these funds.

As contrasted with increases in assessed valuation in prior years ranging from 5% to 10%, this year only a 2.8% increase in assessed valuation occurred during the fiscal year 1967-68. This relatively minor increase provides a total of new funds of somewhat in excess of $100,000. Therefore, primary support this year in balancing the budget has been obtained from the largest year-end cash balance for the General Fund in the history of the county, amounting to $1,336,000, up $476,000 over the $860,000 year-end balance on June 30, 1967. This very favorable cash balance was achieved through direct savings in 1967-68 and through some unanticipated revenues. As a result, the total amount of funds required from property taxes in 1968-69 for general operations of the county (General Fund), but exclusive of library and roads which are funded through separate tax rates, will be $27,000 less than in the last fiscal year 1967-68. Emphasis is placed upon General Fund expenditures since the bulk of county expenditures are made from that fund and the General Fund is therefore the principal user of property tax revenue.

The government of Yolo County, just like any family this year, has had to absorb certain common increases which have increased county expenditures. When the State sales tax was increased by one cent, the county government had to pay the same 25% increase as did everyone in California. When the cost of mail stamps was increased from five (5) cents to six (6) cents, Yolo County paid the same 20% increase as did every one else. As a major purchaser of supplies and a major user of the mails, these increases in 1967-68 were costly. Likewise, basic prices for many county purchases have increased in line with the more than 4% increase in the cost of living index this past year.

The budget of the Accumulative Capital Outlay Fund (Land and Building Fund) is $708,000. This does not include the special reserve of $100,000 which was saved last year for future pay-as-you-go building projects. The 1968-69 budget includes an additional $337,000 to be added to last year's balance for a total special reserve of $437,000 for future building projects, in accordance with the policies of your Honorable Board. Actual planned expenditures for 1968-69 of $371,000 are as detailed on page 33 of this proposed budget.

During the past several years this county, along with other counties, has had to have more operating capital because of reimbursable programs with the state and federal governments. This year an additional $50,000 is placed in the general reserve which cannot be expended and will provide for a total general fund reserve of $100,000. In addition, the Reserve for Contingencies is in the amount of $570,000. It is important to note that funds for the reserve for contingencies may only be expended upon the affirmative vote of four of the five members of the Board of Supervisors.

Particular attention has been given to the critical financial problems which could arise as a result of the Federal Court's elimination of the state welfare residency requirement. It is entirely possible that a major increase in welfare costs could occur because California welfare payments per person are higher than practically all other states.

Originally departmental requests provided for an increase of approximately 35 positions for new county employees in the fiscal year 1968-69. As the result of the review made by your Honorable Board, this total was reduced from 35 to 8 positions, all of which have been authorized effective January 1, 1969, with the exception of one Typist Clerk position in the Probation Department which has been authorized for September 1, 1968.

At this time mention must be made of the fact that negotiations are in process for the return of approximately $250,000 from the State of California due Yolo County for Yolo County advances of federal and state portions of prior year expenditures for Medical Aid to the Aged and Public Assistance Medical Care, and a directly related reduction in the amount of county costs required annually for the operation of the county hospital based upon state law. Since the recapture of such funds is based upon negotiation the amount has not been taken into consideration in connection with the development of this balanced budget.

Pursuant to state law it is recommended that your Honorable Board hold the final budget hearings for the review of the proposed budget prior to the adoption of the final budget for the fiscal year 1968-69 with such hearings to begin on Monday, August 19, 1968 at 2:00 P.M.

Respectfully submitted,

The public interest and necessity require the acquisition, for and in connection with said public improvement, of an interest in real property adjacent to the parcels above designated, for the purpose of exchanging such interest for other real property to be used for widening county highways; the interest required by the public being an easement and right of way for the establishment, construction and maintenance of a ditch and irrigation system, with the right of ingress and egress thereto and therefrom for the purpose of construction, maintenance and operation of an irrigation ditch, and for no other purpose, in, on and to that real property fully described hereinafter, and referred to for convenience as Parcel 7-A and Parcel 9-A; limited, however, in that said easement, to be acquired by the public, in the said Parcel 7-A and Parcel 9-A, shall be equal to, identical to, and subject to the same defenses and limitations as the easements and rights of way for ditch and irrigation purposes presently existing,

WHEREAS, The Land Conservation Act of 1965 authorizes counties to establish agricultural preserves; and

WHEREAS, The purposes of said Act are to maintain the agricultural economy of the state, and prevent premature and unnecessary conversion of land from agricultural uses; and

WHEREAS, The Board of Supervisors of the County of Yolo finds it can assist the maintenance of the state's agricultural economy and avoid conversion of land from agricultural uses by establishing agricultural preserves and entering into agreements with landowners as authorized by said Act; and

2. Application shall also be filed to change the zoning of the property to the Agricultural Preserve (A-P) Zone.

3. The Planning Department shall notice a public hearing

NOTES:—1. The purposes must correspond in every particular with those stated in the election notice.

2. Insert amount of TOTAL authorized issue.

SPECIAL NOTES:

Education Code Section 21609 provides that the bonds shall be signed by the chairman of the board of supervisors, "or by such other member thereof as the board of supervisors shall by resolution adopted by a four-fifths vote of all its members, authorize and designate for that purpose". If it is desired to have the bonds signed by such member rather than the chairman, then the Resolution and Order, and the bond form, should be changed accordingly, and the foregoing and Order must be adopted by such four-fifths vote.

Education Code Section 22041 provides for redemption of school bonds prior to their maturity at the option of the governing board of the school district. The prescribed statutory procedure and the wide diversity of possible redemption provisions render impracticable a general printed form for such matters. It is therefore suggested, should redemption provisions be desired, that competent financial and legal advice be first obtained.

This form is for use only when the principal amount of any issue has been divided into two or more series and Series A is being issued. If the bonds being issued are of a series subsequent to Series A use Form No. 5015-B instead of this Form. If the issue has not been divided into two or more series use Form No. 5015.

RESOLUTION NO. 68-117

WHEREAS, Proposition 9 which seeks to impose an absolute ceiling on property taxes will be placed before the voters of the State of California at the November 5th, 1968 General Election; and

WHEREAS, this Proposition adopts the "meat cleaver" approach to tax reform which seeks to impose an absolute limit upon the overall tax burden on all property and seeks to limit the application of these tax revenues to only a few ill-defined services provided by local government; and

WHEREAS, the Proposition fails utterly to provide for any replacement revenues whatever; and

WHEREAS, the prospective effect of this vicious proposal on all agencies of local government, especially including schools, is the creation of financial chaos; and

WHEREAS, the placement of such a distressingly rigid limitation on local tax revenues invites the termination of local control of local government by the imposition of State control in return for State contribution of revenue; and

WHEREAS, in the judgment of this Board of Supervisors the passage of this Resolution is in the best interest of all the people of this county as well as of the State of California;

NOW, THEREFORE, BE IT RESOLVED by the Board of Supervisors of the County of Yolo that it declares its unalterable opposition to Proposition 9 and that it urges every citizen voter to cast his ballot against this vicious proposal at the November 5th, 1968 election.

RESOLUTION NO. 68-118

WHEREAS, Proposition 1-A which seeks to offer to the California Taxpayer instant relief from property taxes will be placed before the voters of the State of California at the November 5th, 1968, General Election; and

WHEREAS, this Proposition provides relief in the form of a homeowner's exemption of $750.00 assessed valuation; and

WHEREAS, companion legislation already approved by the Legislature and the Governor will take effect if Proposition 1-A is approved; and

WHEREAS, this companion legislation repeals property taxes on household goods and furnishings, provides income tax relief for persons who do not own their own homes and decreases by 15% taxes on retail and wholesale inventory; and

WHEREAS, the financial stability of the local agencies depending upon the tax revenues affected by this Proposition is safeguarded by provisions for replacement revenues; and

WHEREAS, these provisions for replacement revenues involve no increase in the presently existing tax rate structure; and

WHEREAS, Proposition 1-A appears in the judgment of the Board of Supervisors to be a well-reasoned, responsible method of granting property tax relief; and

NOW, THEREFORE, BE IT RESOLVED by the Board of Supervisors of the County of Yolo that it endorses Proposition 1-A as an immediate, effective and responsible approach to property tax relief and that it urges all citizen voters of the State of California to cast their ballots in favor of this proposal at the November 5th, 1968, General Election.

WHEREAS, the Federal Highway Administrator recently filed rules in the Federal Register regarding public hearings and the process of locating and designing all Federal-Aid highways; and

WHEREAS, these proposed rules would cover all Federal-Aid highways, including Federal-Aid secondary, urban extensions, and other highways under the jurisdiction of local agencies; and

WHEREAS, these rules strike at the heart of the principles of home rule and effectively transfer control of location and detailed design from the local jurisdictions to the Federal Highway Administrator in Washington, D.C.; and

WHEREAS, the Federal rules provide for unnecessarily lengthy, involved, and expensive proceedings; and

WHEREAS, while the public should be given the utmost opportunity to be heard in such matters, highway improvements should not be stayed by any individual or group that disagrees with the majority opinion; and

WHEREAS, decisions as to the location and design of city streets and county roads should be made at the local level; now, therefore, be it

RESOLVED by the Board of Supervisors of the County of Yolo that the Federal Highway Administrator is requested to rescind immediately the proposed rules in the Federal Register relating to the location and design of Federal-aid highways; and be it further

RESOLVED, that if the Federal Highway Administrator does not make such rescission forthwith that the adoption of the rules be delayed until a full and complete study can be made on this subject to develop rules to provide for full public involvement; but which would not violate the principles of home rule, or allow interminable delay by dissident persons or groups.
